

VALENTINO RODRIGUEZ

WEB DEVELOPER

/ ABOUT ME

I am a software engineer who specializes in web development, with a strong passion for problem-solving and building beautiful things. Driven by curiosity, I can swiftly learn new, complex concepts and apply them with ease.

/ PROJECTS

>> Voodoo Children

Hackathon - eCommerce Site

<https://voodoochildren.netlify.app/>

- > Technologies used: React, Axios, APIs
- > Worked alongside UI designers to determine what features we had time to implement
- > Developed shopping page and shopping cart functionality, where the data is saved in a MongoDB database without logging in, using an API, so that if the user refreshes or exits the page, their cart will be saved and load once they visit the page again
- > Developed in one day

>> The Vault

Sprite Animation based Game

<https://all4ara.github.io/game-concept/>

- > Worked with a team of developers to create a sprite animation based game
- > Developed the game logic
- > Only first two character sprite animations are currently functional
